## 1 Purpose

The purpose of the Cyber Security Policy is to outline the management direction and confirm its commitment to meeting the Cyber Security standards expected by our customers in the delivery of our services.

## 2 Statement

KAO Data was awarded the Cyber Essentials PLUS certification originally in December 2020. Latest re-certification was completed in February 2024.

This certification requires us to ensure a number of standards are met with regards to cyber security. This includes a hands-on technical verification to ensure the standards are implemented.

The Policy is communicated to all person(s) working for or on behalf of Kao Data (as part of induction training), is available to all employees via the IMS and is displayed in each office location to continually remind employees of the Company's commitment to Cyber Security.

The Policy is also available upon request to all interested parties such as clients, investors, and suppliers.

The Policy is reviewed to ensure its ongoing suitability by the senior management team who recommend amendments and updates to the policy as part of the continual service improvement process, with an annual review of this policy undertaken annually as a minimum.
